

Single Upper Stabilizer Bar

For the EZ Up and other Pop Up tents

Instructions for Use

Parts:

- (1) StaBar Ell Joint (with black Velcro strap attached)
- (1) Long StaBar Ell Joint (with black Velcro strap attached)
- (1) Male pole section – 61" long
- (1) Female pole section – 53 ¼" long, coded BLUE
- (2) Ball Bungees for bundling poles
- (1) Thumbscrew

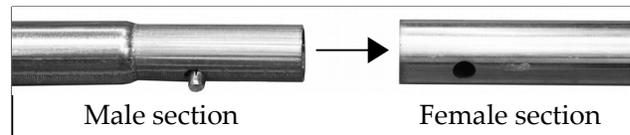

1. Set up your canopy following manufacturer's directions.

2. Slip the two StaBar Joints onto the tops of the two legs between which you would like to place your single StaBar. Take care that you place the joint as high as possible on the leg. Use the attached thumbscrew to secure joint in place.

3. Secure black Velcro strap around the framework of the roof to support the joint and prevent slipping.

4. Assemble the StaBar by clicking together the male and female pole sections.

5. Insert the **Blue Coded** StaBar pole into Long Ell Joint as far as possible. Now move to the other end and slide it back into the short barreled StaBar Joint until you can click the snap button into place. For use with a Door Frame or French Wall Frame, remember to slide the appropriate joint onto the StaBar before installing it.
